1. PART I – BACKGROUND ABOUT NATIONAL SIZING SURVEY OF INDIA

PROLOGUE

National Institute of Fashion Technology (NIFT)

NIFT was set up by the Ministry of Textiles, Government of India in 1986 which has been accorded statutory status under the Act of Parliament in 2006 (NIFT Act 2006) for the promotion and development of education and research in the field of Fashion Technology. NIFT provides fashion business education across the country through its network of 16 campuses. It provides four years under graduate (UG) program in design and technology, two years post graduate (PG) program in design, fashion management & fashion technology and short duration education program to address the specialized needs of professional and students in the field of fashion. NIFT has its Head Office at New Delhi with its campuses located at Bengaluru, Bhopal, Bhubaneswar, Chennai, Delhi, Gandhinagar, Hyderabad, Jodhpur, Kangra, Kannur, Kolkata, Mumbai, Patna, Raebareli, Shillong and Srinagar.

National Sizing Survey of India called INDIAsize

NIFT, New Delhi under the aegis of Ministry of Textiles, Govt. of India, is undertaking an extensive research study to develop a comprehensive size chart for ready to wear industry based on these body measurements of the Indian population. This is a scientific exercise where anthropometric data will be collected from a sample population to create a database of measurements that will culminate in a standardized size chart truly representative of the Indian population, which can be adopted by the entire apparel Industry.

1.1. Specific Objectives & Scope

The main objective of the INDIAsize project is to identify the body dimensions and proportions of India females and males using 3D body scanning technology and to develop the size chart based on human body measurements of Indian population for better fitting of ready to wear garments. The INDIAsize project will also focus on collection of demographic and purchasing preference data using socio-demographic questionnaire. Under this project, a measurement of 25000 (Twenty Five Thousand) male and female persons between the age group of 15 years and 65 years above in six different cities located in six regions of India i.e. Kolkata (East), Mumbai (West), New Delhi (North), Hyderabad (Centre), Chennai (South), and Shillong (North-East) using 3D whole body scanners will be taken.

1.2. Project Sanctioning Authority

The project has been sanctioned by the Ministry of Textiles, Government of India under the scheme Research and Development.

1.3. Technology used for Survey - 3D Whole Body Scanners

The 3D whole body scanners are non-contact method of extracting body measurements and capture highly accurate 3D body maps in less than 10 seconds in one posture. It scans the body and creates a point cloud from where hundreds of body measurements are extracted automatically through computer programming eliminating manual measurement and transcription errors. This technology is quick, accurate and human safe and helps immensely reduce the time frame of the anthropometric surveys. NIFT has procured three 3D whole body scanners.

1.4. Geographical Coverage

The purpose of INDIAsize project is to collect a large set of anthropometric data representative of the overall Indian population. Therefore, to collect this pan India data the 3D body scanners will be positioned at different locations in six geographical regions of India.

S. No.	Geographical Region	City
1	North	New Delhi
2	West	Mumbai
3	South	Chennai
4	Centre	Hyderabad
5	East	Kolkata
6	North-East	Shillong

1.5. Sampling Framework

In order to undertake the study it is decided to collect the measurement of 25577 persons (male and female) in the specified age group as per the details given in the five sampling frame works listed below. Selected Field Support Agency(FSA) shall exactly complete the mandated sampling frame works requirements.

1.5.1. Sampling Framework 1- Region Wise Distribution of States

1.6. Movement of Scanner

3D Whole Body Scanner will be moved between the cities for data collection as per the following plan.

1.6.1. Intercity Movement of scanner

With 3 scanners data collection will be undertaken in 6 cities as follows

- Delhi to Mumbai - 3 scanners
- Mumbai to Chennai- 3 scanners
- Chennai to Hyderabad-3 scanners
- Hyderabad to Kolkata -3 scanners
- Kolkata to Shillong-2 scanners
- Kolkata to New Delhi- 1 scanner
- Shillong to Chennai - 1 scanner
- Shillong to Bangalore- 1 scanner

1.6.2. Tentative time lines of data collection is as follows

Geographical Region	Cities	Time of data collection including scanner transport
North India	Delhi	3.0 months
West India	Mumbai	3.0 months
South India	Chennai	3.0 months
Central India	Hyderabad	1.5 months
East India	Kolkata	3.0 months
North-East India	Shillong (2 scanners)	2.0 months
	Total	15.5 months

1.6.3. Intra-city Movement of Scanner

After intercity transport all the scanners will be in NIFT Campus from where two scanners move to two more locations for maximum coverage and data capturing.

Movement of scanner within a city is as follows -

Scanner 1 - will be positioned in NIFT for the entire duration of data collection

Scanner 2& 3 -will be moved to at least to two different locations within the city for equal duration of time

INTRACITY Movement of Scanner on an average not more than 50 km per movement

	Scanner 1	Scanner 2	Scanner 3		Scanner 1	Scanner 2	Scanner 3
New Delhi	NIFT (3 months)	NIFT to Location 1	NIFT to Location 2	Hyderabad	NIFT (1.5 months)	Moves to Location 13	Moves to Location 14
		Moves to Location 3	Moves to Location 4			Moves to Location 15	Location 16
Mumbai	NIFT (3 months)	Location 5	Location 6	Kolkata	NIFT (3 months)	Location 17	Location 18
		Moves to Location 7	Moves to Location 8			Moves to Location 19	Moves to Location 20
Chennai	NIFT (3 months)	Location 9	Location 10	Shillong	NIFT (2month)	Location 21	
		Moves to Location 11	Moves to Location 12				
Total	6 NIFT locations + 21 Other locations = 27 locations in all						

FSA will be required to complete the sampling framework in each of the location before proceeding to next one with relaxation on each sampling framework as mentioned in Clause 5.21. However, at the end of the project the total samples covered should be as per Clause 1.5.

1.7. Scanning and Indicative time per Activity

INDIAsize booth will have following members per scanner –

SUPPORT STAFF

1. Supervisor – 1 per scanner (to over all look at the smooth functioning of the booth and invite participants). Will be recruited by FSA.
2. Receptionist – 1 per scanner (to inform about the scanning process and take consent with fluency in English and local language). Will be recruited by FSA.
3. Regional Investigator – 1 per scanner (Computer personals for filling online socio - demographic questionnaire with fluency in local language and English). Will be recruited by FSA.
4. MTS – 1 per scanner (to support the personals at the booth) will be recruited by FSA.

SCANNING STAFF

5. Anthropologist – 1 per scanner for taking some manual measurements for validation and for ascertaining size of the participant and issuing scan suit. Anthropologist will also ascertain that the scan taken is of good quality will be recruited by NIFT and salary paid by NIFT.
6. Scanner Operations Executive - 2 per scanner (to scan the participant) will be recruited by NIFT and salary paid by NIFT.

Following activities will take place in the INDIAsize Booth in the listed sequence and approximately as per indicated time

Step 1 –CONSENT FORM FILLING AT RECEPTION On arrival at reception participant will be welcomed and briefed about the project and process of scanning by the receptionist in English or local language. Receptionist will check and record the identity proof for verifying participant as citizen of India. Bio metric recording for identification of duplication of participant will be done at

reception desk. Receptionist will assign a unique bar code/ scan ID to the participant and get Consent form filled (indicative time 2-3 minutes).

Step 2 –SOCIODEMOGRAPHIC QUESTIONNAIRE FILLING Regional Investigator will get the online Socio-demographic questionnaire filled by interacting with the participant in English or local language on computer or tab provided (indicative time 3-4 minutes).

Step 3 –SCAN SUIT ESTIMATION Supervisor /Anthropologist recruited by NIFT will ascertain the participants size by taking few measurements by tape measure and identify the size of the participant for the scan suit and hand over the scan suit to subject (indicative time 1-2 minutes).

Step 4 – DONNING SCAN SUIT IN CHANGE ROOM Participant will change into scanning suit and go to the scanning chamber (indicative time 2-3 minutes).

Step 5 – ACTUAL SCANNING IN SCANNING CHAMBER Scanner Operations Executive (1 male and 1 female recruited by NIFT) will scan participants in different poses and will check the scan for accuracy (indicative time 4-5 minutes).

Step 7 – THANK YOU / SUPERVISOR’S DESK After the scanning process is complete participant will change back into their own clothes. They will be given copy of the consent form for record and as proof of participation. They will be handed over the gift coupon with a thank you note by the supervisor (indicative time 2-3 minutes).

In all maximum 20 minutes for first candidate which will go down for subsequent candidate as participants will be in different stages of listed steps and will take 15 minutes. In a day average 28 participants can be covered in day. However, the number can vary on lot of factors and efficiency of the field support team.

1.8. Time Period of the Contract

The overall duration of the contract is about 18 months (1month booth creation and recruitment of staff + .5 months training of staff at NIFT + 15.5 months data collection + 1 month report submission) duration and it starts from signing of the contract/ agreement with NIFT till submission of the Final Completion Report and handing over of all equipment’s to NIFT Delhi. After awarding the contract the FSA needs to recruit manpower and submit detailed action plans before starting actual scanning.

However, the Scanning Duration of the project is 15.5 months including 7 days per inter and intracity transfer (i.e. in all 14 months of data collection and 1.5 months of scanner transport)

The data collection shall start from the day all 3 scanners are at their respective first locations i.e. NIFT Campus, Location 1 & 2 and data collection will finish the day activity is over for all scanners in their respective last location i.e. NIFT Campus, Location 21.

Within 15 days (1 month) after completion of the activity on Location 21, FSA shall be required to submit a detailed completion report recapping the coverage of the sample framework region wise and in totality. Additionally, all the equipment’s issued by NIFT have to be returned to NIFT Delhi.

2. PART II - PURPOSE OF THE BID

The purpose of this bid is to appoint Field Support Agency (FSA) / Company for conducting the anthropometric survey for INDIAsize during 2020-2021 in the different states of India as per the proposed sampling framework in proposed timeline.

2.1. Recruitment of Field Support Agency (FSA)

NIFT will have the overall responsibility for the implementation of INDIAsize project. However, considering the magnitude of data collection work, reputed field support agencies will be hired for data collection work. The selection of these agencies will be done by inviting technical and price bids from all the interested agencies. Strength of personnel available and previous experience in carrying out pan India crowd mobilization events/ surveys will be important criteria for the selection. A committee comprising all stakeholders constituted for this purpose will evaluate the technical and price bid and recommend the selection of field support agency for final acceptance by the Competent Authority.

2.2. Scope of Work of FSA

FSA is required to provide following support to the project. The proposal should be prepared on the basis of the following scope of work.

SET 1 (without venue)

- Booth – Preparation, setting up, shifting and security of booth
- Promotion and crowd mobilization to meet sampling framework
- Manpower recruitment and compensation

SET 2 (with venue)

- Booth – Preparation, setting up, shifting and security of booth
- Promotion and crowd mobilization to meet sampling framework
- Manpower recruitment and compensation
- Venue for placement of scanner

FSA has to be prepared to undertake activities listed in both Set 1&2. NIFT may opt to offer neither of the set to FSA

2.2.1. Booth – Preparation, setting up, shifting and security of booth

The scope of work of FSA would include preparation of the booth for scanner. This would entail construction of the booth with partitions, proper signage, front façade, office furniture and electrical connections and other related issues.

Fixtures would include clothes pegs and counters in changing rooms, electric sockets for all work stations, extension cords, lighting fixtures, display aids 4 standees/ easels, fire extinguisher, 32" LCD/LED screen, and wall mounted soft boards around the reception area, CCTV for monitoring activity in booth and support infrastructure, photocopier for making copies of consent form, stationery, cartridge, folding ladder, First aid kit, Electric Connectors and Extensions, lockers, dustbins and garbage bags etc.

3. If any of the information is missing, the offer shall be rejected.

6.9. Final Combined Evaluation Process of the Bids

The Technical and Price Bid shall be evaluated separately. Tendering evaluation shall be done on marks scored by the Bidder on both Technical and Price Criteria. (As per GFR rules 192). The weightage for Technical Bid is set at 70% whereas the weightage for Price Bid is set at 30%.

Technical Bid Evaluation Criteria - All qualified bids will be evaluated as per the score provided in clause 6.4 & 6.5.

Price Bid Evaluation Criteria - After the cost comparison and bringing all costs to a standard evaluation number the price proposal will be evaluated using QCBS. The lowest evaluated Price Proposal will be given the maximum price score of 100 points. The price scores of the other Price Proposals will be computed on relative scale.

Combined and Final Evaluation- Proposals will finally be ranked according to the total score (Technical Score + Price Score).

Formula for Determining the Price Scores

- 70% weightage will be awarded for Technical Evaluation and 30% weightage will be awarded for Financial Evaluation.
- Technical Bid will be assigned a Technical score (Ts) out of a maximum of 100 points, as per the Scoring Model provided in the previous section.
- The Price bid would be normalized on a scale of 100, with lowest score being normalized to 100 and the rest being awarded on a pro-rata basis. Such normalized scores would be considered for the purpose of QCBS based evaluation, explained in section below.

- **Final Evaluation Criteria Quality and Cost based selection (QCBS)**

The individual Bidder's Price bids are normalized as per the formula below:

$F_n = F_{min}/F_b * 100$ (rounded off to 2 decimal places) Where,

F_n = Normalized commercial score for the Bidder under consideration

F_b = Absolute financial quote for the Bidder under consideration

F_{min} = Minimum absolute financial quote

Composite Score (S) = $Ts * 0.7 + F_n * 0.3$

The Bidder with the highest Composite Score(s) would be awarded the contract.
