## STUDENT LAPTOP POLICY

### 1. Introduction

This document presents the policy adopted by NIFT regarding mandatory use of laptops by all the students of all academic programmes. The policy has been formulated in view of the significant impact of laptops in academic outcomes, and current usage of laptops by the regular students at NIFT. The policy deals with provisions for financial assistance for the students, eligibility criteria for the same and the process of application for financial assistance in details. This policy has been framed with a futuristic approach keeping in view the fast rate of redundancy of computer hardware and software. The policy has been named as 'student laptop policy' however, the provisions have been drafted in a way so that the same remain valid for any other form of portable electronic device(s) which may replace laptop in near future due to advancement in ICTs.

#### 1.1 Laptops as learning tools

The applications of enabling technologies have far reaching impact on the learning environment of an institution. The portable electronic devices viz, laptops, notebooks, mobile phones, etc. are being increasingly used by students as learning tools. Among these devices laptop is currently the most popular device of academic use. Globally, studies have proved that judicious use of laptops contributes to significant enhancements in academic achievements of students thereby improving educational outcomes in academic institutions. NIFT is striving for optimum integration of state-of-the-art technologies with the curricula and formulation of a policy for mandatory use of laptops by all students is a step towards that direction.

Laptop computers have changed the experience of learning globally as students can organize and access their learning sources in a fast pace. This device facilitates 24/7 interactive learning as it enables students and faculty to connect through continuous information exchange. The portability of laptop leads to seamless merging of classroom learning with learning outside and helps students carry out research and gather inputs for their assignments from institutional online resources and open access sources on the Internet anywhere anytime. Additionally, research using laptops also helps the students to gain access to high – quality information independently and thus also promote self-

learning as well as group studies. The use of laptops in design studies is immense due to widespread applications of software in the creative process.
