MESSAGE FROM THE CAMPUS DIRECTOR

Corruption they say is the cancer of progress. In a traditional society like that of India, probity in public life is very important. Ever penny spent by the government in a growing economy like India should be done with utmost caution and sanctity.

As they say, it takes two to tango. Corruption is fostered by a mindset that does not have the patience for procedures and want to get into the fast lane through short cuts. a mindset that is willing to risk the greater common good for individual gain. This is why value education and ethics are important. And these need to start from childhood. it is in this context that observance of vigilance awareness in educational institutions becomes crucial. I urge each and every student and official of NIFT, Bengaluru to do their bit in not only preventing corruption by maintaining the highest standards of community living but also create awareness and be eternally vigilant.
