Continuing Education Programme

# GPTAD

## Garment Production Technology & Apparel Design

One year part time certificate course

**Department of Fashion Technology**

**National Institute of Fashion Technology**  
Gandhinagar

# "Those Who visualize the invisible do the impossible"

## About the Course

Under continuing education programmes , NIFT Gandhinagar is conducting one year part time certificate course namely "Garment Production Technology & Apparel Design (GPTAD)" for the students, entrepreneurs and working people.

In the fast changing scenario increasing competitions , small & inefficient units all are rapidly replaced by larger and more efficient ones because right volume output at reduced prices is the demand of this industry. The need therefore is of qualitative inputs provided by NIFT, to get initiated in this direction and be able to start a boutique or expand one's own successful & competent Garment manufacturing unit with the proper understanding of technology and the world of Fashion.

In this course students are exposed to the different dimensions of the fashion and readymade Garment industry, including entrepreneurship in boutique/fashion studios.

In conformity with this motto, the certificate programme orients the students/Industry people towards the creativity, aesthetic inquiry, visual and perceptual skills along with core mass production inputs, which further strengthen knowledge, supervision and entrepreneurial skill.
