

## MESSAGE

Dear Class of 2021,

I am extremely delighted to know that the batch of 2021 is ready to enter the Fashion world. This batch of 2021 is indeed a special one for the courage, patience that you demonstrated in these tough times of Pandemic. Your struggle to give your best in this unprecedented time will take you to a new high in your professional life. While moving up the ladder during your success journey always remember the people at the grassroots level who are part of the fashion Industry but get unnoticed. The craft cluster initiatives of NIFT has already provided you this exposure wherein you know how the craftsmen, artisans, master craftsmen work in villages to make crafts, products for the glamour world. I am sure this initiative of NIFT will always keep you humble, make you a good professional and person with value for social and human life.

I am happy to present the work of the graduating batch of 2021 to the world, which is a reflection of the final outcome of your work with learning from NIFT and support of Industry. It was not easy to complete this final segment of your academic journey where the entire world was struggling for well-being.

I wish all the success in your journey into the future. My blessings and wishes will always be there with each one of you.

  
(Shantmanu)
